

SAHIL HAMID SHAIKH

Software Development Engineer, Chandrapur, India

+91 9146749096 | ssahil9635@gmail.com | LinkedIn: <https://www.linkedin.com/in/sahil-h-shaikh/>

GitHub: <https://github.com/Sahilhamids> | LeetCode: <https://leetcode.com/u/sahilhamid/>

PROFESSIONAL SUMMARY

Software Developer with strong foundation in Data Structures and Algorithms using Python. Solved 90+ LeetCode problems and developed strong debugging and problem-solving skills through real-world automation systems. Led centralized HMI upgrade for a 16-spout packer system achieving ~30% downtime reduction.

TECHNICAL SKILLS

Programming: Python (DSA & Problem Solving), C (Embedded Systems), C++ (Basic)

Python Libraries: collections, math (Basic)

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, Hashing, Recursion, Searching, Sorting, Trees, Heap, Graphs, Dynamic Programming

Core Computer Science: Object-Oriented Programming, Computer Networks (Basic)

Software Development: Debugging, Time & Space Complexity Analysis

Tools: Git (Basic), GitHub, VS Code, Linux

PROFESSIONAL EXPERIENCE

Assistant Manager – Electrical & Instrumentation | Ambuja Cements Ltd. (Adani Group) (April 2026 – Present)

- Led 16-spout packer HMI upgrade, converting distributed architecture into centralized control system
- Achieved ~30% reduction in machine downtime through system restructuring and validation
- Worked with ABB Distributed Control System (DCS) on signal monitoring and fault diagnostics
- Coordinated troubleshooting and commissioning of industrial automation systems

Graduate Engineer Trainee – E&I | Ambuja Cements Ltd. (Adani Group) (July 2024 – March 2026)

- Assisted troubleshooting of motors, sensors, and field instrumentation systems
- Supported calibration and verification of industrial signals
- Participated in shutdown maintenance and system diagnostics

PROJECTS

Smart Automated Fertigation System | C, ESP32, Sensors, Wi-Fi (July 2024 – April 2025)

- Developed firmware in C on ESP32 for automated fertilizer control
- Implemented rule-based logic using sensor inputs for nutrient dosing
- Enabled remote monitoring through IoT integration
- Led a 5-member team during development and testing

GSM-Based Home Automation System | C, Arduino, GSM (Jan 2023 – May 2023)

- Built GSM-based remote appliance control system
- Implemented command-based switching logic
- Designed firmware for reliable communication handling and executed actions based on received commands

CODING PROFILES

LeetCode: Solved 90+ Data Structures and Algorithms problems

EDUCATION

Bachelor of Engineering (BE) – Electronics & Telecommunication Engineering (Year of Graduation: 2025)
Government College of Engineering, Chandrapur

CERTIFICATIONS

Python (Basic) — HackerRank | Embedded Systems — Internshala

ACHIEVEMENTS

- Promoted to Assistant Manager based on performance
- Solved 90+ Data Structures and Algorithms problems on LeetCode
- Secured the highest score in final-year engineering project evaluation
