

SAHIL HAMID SHAIKH

Backend Engineer (Python / FastAPI) — Software Engineer, New Grad

Hyderabad, India • +91 9146749096 • ssahil9635@gmail.com • [LinkedIn](#) • [GitHub](#) • [LeetCode](#) • [Portfolio](#)

EDUCATION

Government College of Engineering, Chandrapur

Dec 2021 – Jun 2025

Bachelor of Engineering, Electronics & Telecommunication Engineering

- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS (SQL), Python, C
- Led a 5-member team to a 1st-place finish (out of 6) in the final-year capstone project; solved 140+ algorithmic problems on LeetCode in Python

EXPERIENCE

Assistant Manager, Automation & Instrumentation | Ambuja Cements Ltd. (Adani Group)

Apr 2026 – May 2026

- Reduced packing-line downtime by approximately 30% by leading the redesign of a 16-spout packing machine's control architecture, consolidating six distributed controllers into a single centralized HMI system
- Cut manual payment-dispute processing time by building automated approval-routing workflows in SAP Advanced Workflow, writing custom Groovy scripts for SAP Incentive Management
- Improved plant uptime by monitoring real-time signals and diagnosing equipment faults on an ABB Distributed Control System (DCS) serving multiple production units
- Promoted to Assistant Manager within the first year of employment based on performance

Graduate Engineer Trainee, Automation & Instrumentation | Ambuja Cements Ltd. (Adani Group)

Jul 2025 – Mar 2026

- Enabled shift-wise efficiency reporting for plant operations by writing PL/SQL queries against Oracle databases to extract and structure historical process parameters
- Maintained automation uptime by performing logic simulation in CodeSys, equipment wiring, and sensor-level troubleshooting across production lines

PROJECTS

SafarHisab — Travel Expense & Settlement Engine | Python, FastAPI, SQLAlchemy, Alembic, PostgreSQL, JWT

- Cut peer-to-peer settlement transactions by 40%+ by designing and implementing a max-heap-based debt-settlement algorithm within a REST API for group travel expense tracking
- Built JWT role-based authentication, Alembic schema migrations, real-time multi-currency conversion via the Frankfurter API, and an event-driven notification service

Career Intelligence Platform — Resume/JD Matching SaaS | Python, FastAPI, Gemini API, Groq, PostgreSQL, JWT

- Eliminated AI-endpoint downtime by architecting a dual-LLM routing layer that automatically fails over from Google Gemini to Groq/Llama-3.1 when latency thresholds are exceeded
- Shipped JWT-based anonymous sessions, rate limiting, PDF/DOCX export, AI cover-letter generation, and a Kanban job tracker; deployed to production on Render

Smart Automated Fertigation System | C, ESP32, Proteus, Modbus, I2C, IoT

- Led a 5-member team to a 1st-place finish (of 6 teams) by designing an ESP32-based system that automated NPK fertilizer dosing from real-time soil sensor data
- Implemented sensor-driven relay control logic, an I2C sensor bus, and Modbus communication; validated the complete circuit design through simulation in Proteus Professional

TECHNICAL SKILLS

- **Languages:** Python, C, SQL/PL-SQL, Groovy
- **Backend & APIs:** FastAPI, SQLAlchemy, Alembic, Pydantic, JWT Auth, REST API Design
- **Databases:** PostgreSQL, Oracle
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Complexity Analysis
- **Tools & Platforms:** Git/GitHub, Linux CLI, VS Code, AWS (Lambda, S3, Glue — familiar), Claude Code, Google Antigravity IDE

CERTIFICATIONS

- Python (Basic) — HackerRank • Problem Solving in Python — HackerRank • Embedded Systems — Internshala • Industrial Automation Bootcamp — Udemy
